

TYRELLN6 CORDERO

BY THE UNFINISHED

INTRODUCTION

TyrellN6 Cordero is a brand new “free” soundset that allows you to name your own price and donate towards **Women’s Aid**, to celebrate **International Women’s Day**.

This collection of 90 patches for **TyrellN6** takes full advantage of u-he’s awesome emulation of the classic **Roland Juno 60** synth.

It features punchy and growling basses, dark and sumptuous pads, eclectic and lush leads, dynamic and gritty basslines and sequences, and classic old skool synth noises.

A world of weird and wonderful analogue emulation awaits, particularly if you’re a fan of composers such as **Ben Salisbury & Geoff Barrow**, **Cristobal Tapia de Veer**, **Mac Quayle** and **John Carpenter**.

If you donated towards **The Unfinished’s International Women’s Day** event, to help support **Women’s Aid**, a huge thank you for your kindness and generosity.

Enjoy!
